

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	03 October 2026
Team ID	SWTID-2026-1951
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	UI Policy Control	Control Incident field state dynamically Apply field-level behavior through UI Policy Actions Keep the Incident form simple for the user
FR-2	onChange Client Script	React to field changes Give the Incident user immediate guidance
FR-3	onSubmit Client Script	Validate data before the record is saved Stop invalid data at the submit event
FR-4	onCellEdit Client Script	Validate inline edits made in the Incident list Block invalid values before they are stored

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Users get clear, immediate guidance on the Incident form as they work.
NFR-2	Security	Rules run inside the ServiceNow platform and follow its role-based access controls.
NFR-3	Reliability	Rules apply consistently on every field change, form submit and list cell edit.
NFR-4	Performance	Client-side rules respond in the browser without waiting for a server round-trip.
NFR-5	Availability	Available whenever the ServiceNow instance is available, since the rules run on the platform.
NFR-6	Scalability	Rule-based logic applies to every Incident record without extra infrastructure.
