

User Acceptance Testing (UAT) Template

Date	03 October 2026
Team ID	SWTID-2026-1951
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	

Project Overview:

Project Name: Implement Client Script & UI Policy (Incident)

Project Description: Implements Client Scripts and UI Policies on the ServiceNow Incident form to improve user experience, enforce field behavior, and reduce incorrect data entry. Form fields are controlled dynamically based on user actions and incident conditions, without requiring the form to be submitted.

Project Version: 1.0

Testing Period: 1 September 2026 to 3 October 2026

Testing Scope:

Features: UI Policy on Incident, UI Policy Action (Urgency), onChange Client Script, onSubmit Client Script (Save Validation), onCellEdit Client Script.

User Stories: USN-1 to USN-11 from the Project Planning Phase (7 epics, 11 stories).

Testing Environment:

URL/Location: ServiceNow Personal Developer Instance (PDI) - Incident application, Incident form

Credentials (if required): Admin or developer role account (shared separately, not recorded here)

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	UI Policy - condition met	Open Incident > Create New Set the UI Policy condition value Check the affected fields	Field state changes as configured	Field state changed as configured	Pass
TC-002	UI Policy - condition not met (negative)	Open Incident > Create New Leave the condition unmet or clear it Check the affected fields	Fields stay in their default state	Fields stayed in default state	Pass

TC-003	UI Policy Action - Urgency	Open a new Incident Trigger the UI Policy Check the Urgency field	Urgency field behaves as set by the UI Policy Action	Urgency field behaved as set by the UI Policy Action	Pass
TC-004	onChange - monitored field changed	Open a new Incident Change the monitored field Watch the form	Guidance appears without submitting	Guidance appeared without submitting	Pass
TC-005	onChange - unrelated field changed (negative)	Open a new Incident Change a field that is not monitored Watch the form	No guidance or message appears	No guidance or message appeared	Pass
TC-006	onSubmit - valid data	Fill the Incident with valid data Click Submit/Save Check the record	Incident is saved successfully	Incident saved successfully	Pass
TC-007	onSubmit - invalid data (negative)	Fill the Incident with invalid data Click Submit/Save Read the message	Save is blocked and a clear message is shown	Save was blocked and a clear message was shown	Pass
TC-008	onCellEdit - valid inline edit	Open the Incident list Double-click a cell and enter a valid value Confirm the edit	Edit is accepted and saved	Edit was accepted and saved	Pass
TC-009	onCellEdit - invalid inline edit (negative)	Open the Incident list Double-click a cell and enter an invalid value Confirm the edit	Edit is rejected with a message	Edit was rejected with a message	Pass
TC-010	All rules together	Create an Incident using UI Policies and Client Scripts Edit it inline in the list Save it	Rules work together without conflict	Rules worked together without conflict	Pass

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
