

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	03 October 2026
Team ID	SWTID-2026-1951
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template to shape ideas for Implement Client Script & UI Policy (Incident) on ServiceNow, so the team can start shaping concepts together.

⌚ 10 minutes to prepare
🕒 1 hour to collaborate
👥 5 team members

➔

Before you collaborate
A little bit of preparation goes a long way with this session. Here's what you need to do to get going.

⌚ 10 minutes

A Team gathering
Mohammed Akif A, Madhavansundhar R, Karthikeyan S, Hayagreevan K and Amirthaa Nikash B joined the session.

B Set the goal
Make the ServiceNow Incident form guide users and protect data quality.

C Know the tools to use
Use UI Policies and Client Scripts (onChange, onSubmit, onCellEdit) to guide Incident users.

UI Policy & Client Script →

1

Define your problem statement
What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.

⌚ 5 minutes

PROBLEM

How might we give Incident users immediate guidance and stop invalid data at the correct event using UI Policies and Client Scripts?

Key rules of brainstorming
To run a smooth and productive session

- Stay in topic.
- Defer judgment.
- Go for volume.
- Encourage wild ideas.
- Listen to others.
- If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP

You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

Declarative rules set how Incident fields look and behave

UI Policy Control
Control incident field state dynamically

UI Policy Action
Apply field-level behavior

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Event-based scripts react to user input and stop invalid data

onChange Client Script
React to field changes

onSubmit Client Script
Validate before save

onCellEdit Client Script
Validate inline list edits

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

Prioritized Direction

Combine declarative UI Policies with event-based Client Scripts so Incident users receive immediate guidance and invalid data can be stopped at the correct event.

The project is intentionally rule-based and does not require AI or machine learning.

High: UI Policy Control, UI Policy Action, onChange, onSubmit
Medium: onCellEdit
