

Ideation Phase

Define the Problem Statements

Date	03 October 2026
Team ID	SWTID-2026-1951
Project Name	Implement Client Script & UI Policy (Incident)
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	An Incident user on the ServiceNow platform who creates and updates Incident records
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	Enter accurate Incident details quickly and save a valid record
but	Describe what problems or barriers stand in the way -- what bothers them most?	The form gives me no immediate guidance, and invalid data can get through when I change a field, submit the form or edit a list cell
because	Enter the "root cause" of why the problem or barrier exists -- what needs to be solved?	Field behavior and validation are not controlled dynamically, and no check runs at the correct event (onChange, onSubmit, onCellEdit)
which makes me feel	Describe the emotions from the customer's point of view -- how does it impact them emotionally?	Unsure and frustrated, and worried that incorrect data will end up in the Incident record

Reference: <https://miro.com/templates/customer-problem-statement/>

Example:

I am an Incident user	I'm trying to save a valid Incident record	But invalid data can get saved	Because No check runs at the correct event, such as onChange or onSubmit	which makes me feel Frustrated
---	--	--	--	--

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	Incident user on ServiceNow	Enter accurate Incident details	I get no immediate guidance on fields	Field behavior is not controlled dynamically (UI Policy)	Unsure and frustrated
PS-2	Incident user on ServiceNow	Save a valid record or edit it inline	Invalid data can get through	No validation runs at the right event (onSubmit, onCellEdit)	Worried that incorrect data will be saved
